

## Ejercicio 1 - Instalación de Laravel

### 1. Creando proyecto con laravel

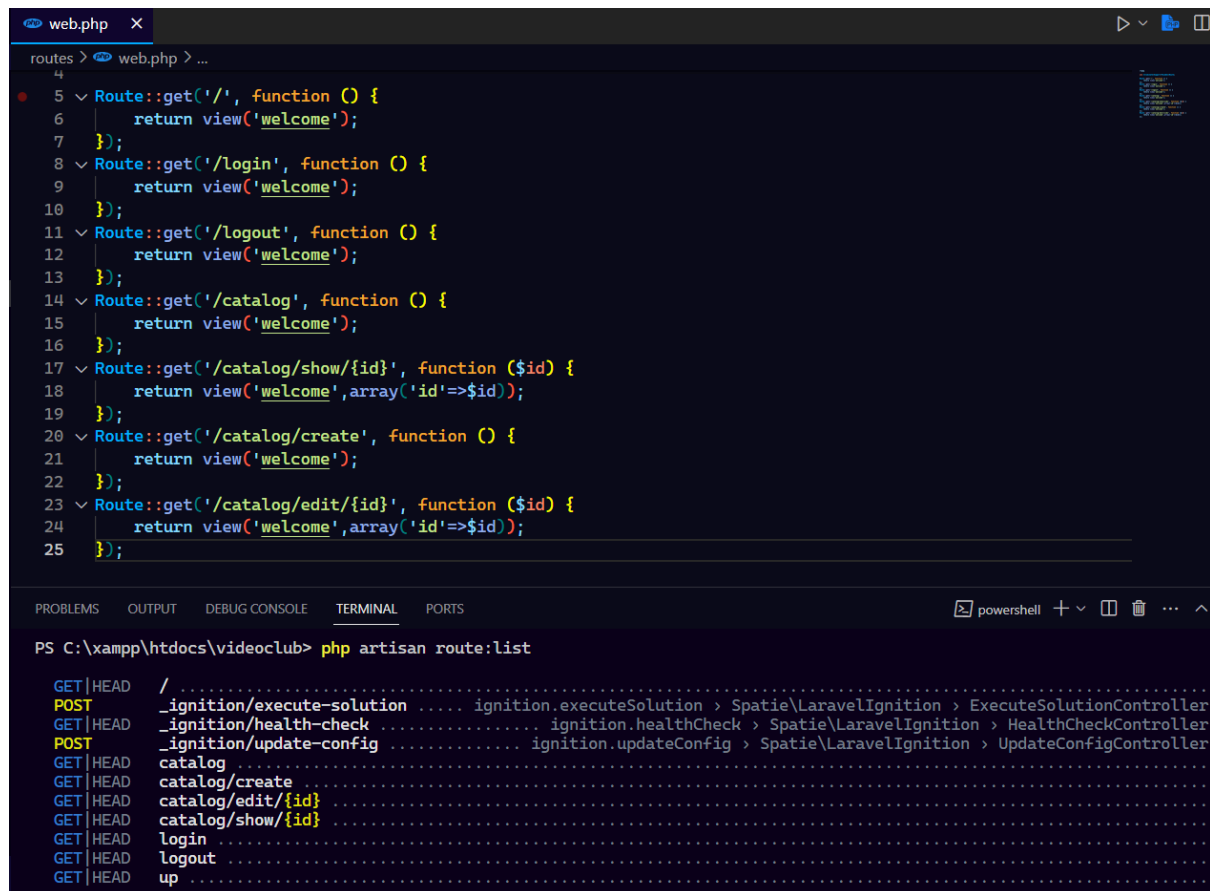

- Utilizamos la herramienta git para utilizar su terminal.
- Creamos el proyecto en laravel con el nombre “videoclub” con : ***composer create-project laravel/laravel videoclub***
- *Iniciamos XAMPP y accedemos al proyecto*

```
MINGW64:/c:/xampp/htdocs
acer@LAPTOP-HR1R7IL4 MINGW64 /c:/xampp/htdocs
$ composer create-project laravel/laravel videoclub
Creating a "laravel/laravel" project at "../videoclub"
Installing laravel/laravel (v11.0.9)
- Installing laravel/laravel (v11.0.9): Extracting archive
Created project in C:\xampp\htdocs\videoclub
> @php -r "file_exists('.env') || copy('.env.example', '.env');"
Loading composer repositories with package information
Updating dependencies
Lock file operations: 111 installs, 0 updates, 0 removals

```

## Ejercicio 2: Definición de las rutas

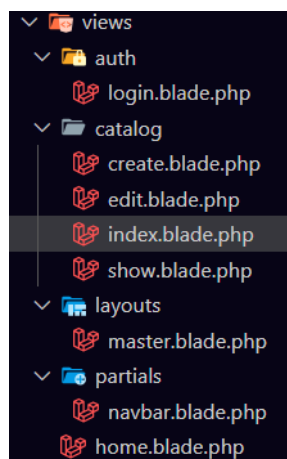

```
web.php
4
5 Route::get('/', function () {
6     return view('welcome');
7 });
8 Route::get('/login', function () {
9     return view('welcome');
10 });
11 Route::get('/logout', function () {
12     return view('welcome');
13 });
14 Route::get('/catalog', function () {
15     return view('welcome');
16 });
17 Route::get('/catalog/show/{id}', function ($id) {
18     return view('welcome', array('id' => $id));
19 });
20 Route::get('/catalog/create', function () {
21     return view('welcome');
22 });
23 Route::get('/catalog/edit/{id}', function ($id) {
24     return view('welcome', array('id' => $id));
25 });

PS C:\xampp\htdocs\videoclub> php artisan route:list

GET|HEAD / ..... ignition.executeSolution > Spatie\LaravelIgnition > ExecuteSolutionController
POST _ignition/execute-solution ..... ignition.executeSolution > Spatie\LaravelIgnition > ExecuteSolutionController
GET|HEAD _ignition/health-check ..... ignition.healthCheck > Spatie\LaravelIgnition > HealthCheckController
POST _ignition/update-config ..... ignition.updateConfig > Spatie\LaravelIgnition > UpdateConfigController
GET|HEAD catalog .....
GET|HEAD catalog/create .....
GET|HEAD catalog/edit/{id} .....
GET|HEAD catalog/show/{id} .....
GET|HEAD login .....
GET|HEAD logout .....
GET|HEAD up .....
```

## Ejercicio 3: Layout principal de las vistas con Bootstrap

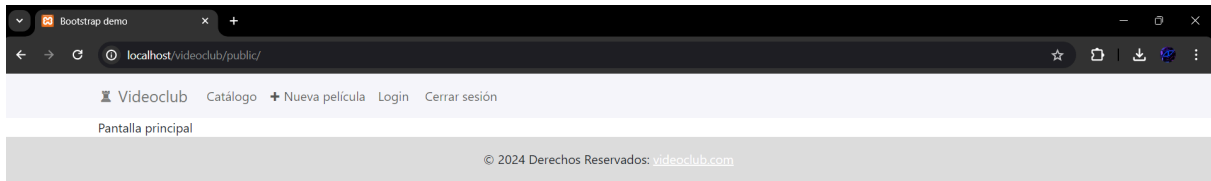

Le añadimos como contenido la plantilla base HTML que propone Bootstrap en su documentación <http://getbootstrap.com/getting-started/#template>.

#### Ejercicio 4: Crear el resto de vistas y reorganizar las rutas.

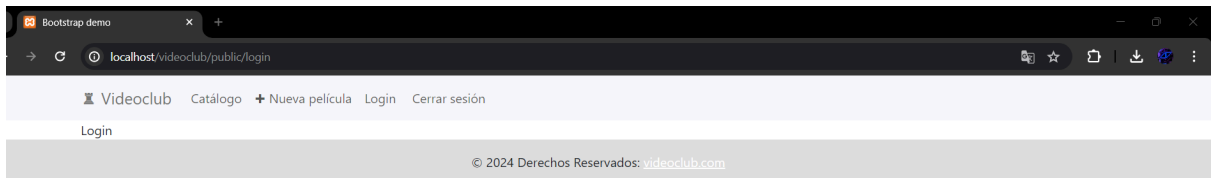

```
web.php × index.blade.php show.blade.php home.b
routes > web.php > Closure
1  <?php
2
3  use Illuminate\Support\Facades\Route;
4
5  Route::get('/', function () {
6      return view('home');
7  }->name('inicio');
8
9  Route::get('/login', function () {
10     return view('auth.login');
11 }->name('login');
12
13 Route::get('/logout', function () {
14     //Logica para cerrar sesion
15     return redirect('/');
16 });
17
18 Route::get('/catalog', function () {
19     return view('catalog.index');
20 });
21
22 Route::get('/catalog/show/{id}', function ($id) {
23     return view('catalog.show',array('id'=>$id));
24 });
25
26 Route::get('/catalog/create', function () {
27     return view('catalog.create');
28 });
29
30 Route::get('/catalog/edit/{id}', function ($id) {
31     return view('catalog.edit',array('id'=>$id));
32 });
```

## Resultado final:

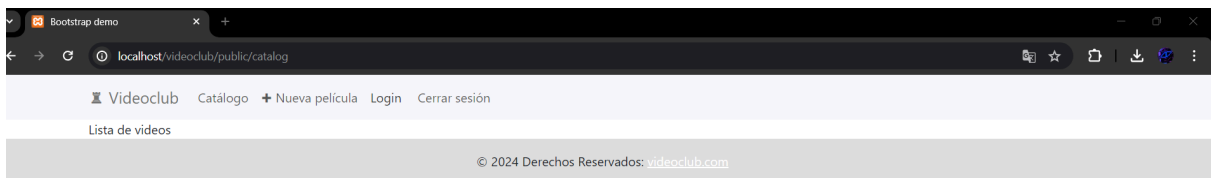

```
Route::get('/', function () {  
    return view('home');  
})->name('inicio');
```

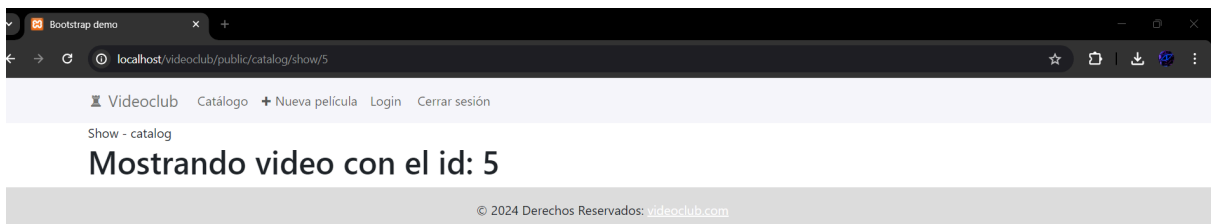

```
Route::get('/login', function () {  
    return view('auth.login');  
})->name('login');
```

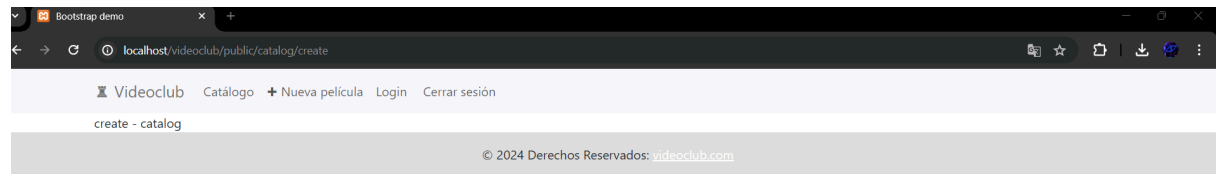

```
Route::get('/catalog', function () {  
    return view('catalog.index');  
});
```

```
Route::get('/catalog/show/{id}', function ($id) {  
    return view('catalog.show', array('id'=>$id));  
});
```

```
Route::get('/catalog/create', function () {  
    return view('catalog.create');  
});
```

```
Route::get('/catalog/edit/{id}', function ($id) {  
    return view('catalog.edit', array('id'=>$id));  
});
```
